# Title IX Student Educational Training

Education and training are important tools for preventing and responding to sex- and gender-based violence and harassment.

Prevention education strategies are meant to create and support positive, respectful, and equitable work and learning environments and endeavor to stop sex- and gender-based violence and harassment before they happen. Each year violence prevention research provides more insights into how communities can prevent violence and harassment from happening in the first place.

At Laredo College, we remain committed to fostering environments where you feel valued and supported and have the opportunity to learn and grow. As a member of the LC community, you also have an important role to play in ensuring a respectful environment for your community members.
