## List of Associate of Arts & Associate of Science Fields of Study - FORM 3

Laredo Community College (LCC) awards a general Associate of Arts (AA) or Associate of Science (AS) degree which requires the completion of the entire Texas Core Curriculum (TCC) as well as "Field of Study" electives. The field of study refers to the academic discipline or subject you pursue as an undergraduate student. The field of study is critical because it helps you and your advisor determine the coursework, aside from the TCC, that you must complete to earn a specific degree at LCC and beyond. Selection of a field of study will also determine which office you should seek advising from. If you do not see your field of study listed below check off other and write it in. If you have not decided on a field of study, select General Studies. If you are a non-degree seeking student, select Self-Enrichment. Effective Fall 2016, credit for technical/vocational courses can only be applied to an Associate of Science degree. Please consult an advisor for questions about program and field of study selection.
